

**BAG MAKING**

Fully Automatic T-Shirt Bag Making Machine — 480 mm × 2

High-speed double-line machine making T-shirt shopping bags from HDPE/LDPE film — bag width to 480 mm on each line, 250 bags a minute per line.

**480 mm × 2**

MAX. BAG WIDTH

250 pcs/min × 2

SPEED

0.015 – 0.035 mm

THICKNESS

7 kW

TOTAL POWER

A fully automatic, high-speed machine that turns HDPE or LDPE roll film into T-shirt (vest) shopping bags of the kind supermarkets hand out. Feeding, sealing, cutting, hole punching and conveying run as one continuous process, on two lines at once.

A PLC with a double servo drive holds each line to a fixed bag length, set on a touch screen. A photocell follows the print mark on printed film; the punching unit makes bags with or without a side fold, and a PU conveyor carries the finished bags out.

TECHNICAL PARAMETERS

Model	RGHQ-500X2B
Max. bag width	480 mm × 2
Max. bag length	650 mm
Film thickness	0.015 – 0.035 mm (single layer)
Speed	250 pcs/min × 2
Material	HDPE / LDPE roll film
Air pressure	5 kg/cm ²
Total power	7 kW
Machine weight	2,500 kg
Overall dimensions (L×W×H)	6.0 × 1.4 × 1.6 m
Bag types	T-shirt shopping bags, folding and non-folding

SPARE PARTS SUPPLIED

Thermocouple	2
Temperature controller	1
Spring	20
Electric valve	1
Relay	1

Belt	1
Heater	2
Heating tube	2
Switch	1
Button	1
Tool box	1
Operation manual	1

MAIN COMPONENTS

- | | |
|--|---|
| 1. Yaskawa servo motor for feeding | 7. Yudian temperature controller (Taiwan) |
| 2. Main motor 1.5 kW, Chinese brand | 8. Airtag electric valves (Taiwan) |
| 3. Sick photocell | 9. PLC and touch screen, Chinese brand |
| 4. Panasonic photocell × 2 (Japan), for printed bags | 10. Chint electric parts |
| 5. Eura inverter (Taiwan) | 11. Machine body of 12 mm steel plate |
| 6. Marto air cylinders (Taiwan) | |

KEY FEATURES

- Two lines at once — up to 250 bags a minute on each.
- Fixed-length feeding by PLC and double servo, set on a touch screen (manual in English).
- Film rolls loaded by air cylinder; unwinding under frequency-motor control with an Eura inverter.
- Panasonic photocells follow the print mark on printed bags.
- Static eliminator box and air feeding through the sealing and cutting section.
- Copper sealing knife and a strengthened cutting-knife holding shaft.
- Punching on a 15 mm nylon plate with a hard-wearing cutting knife; makes folding and non-folding bags.
- PU conveyor delivers the finished bags.
- Heavy 12 mm steel plate structure, automotive paint finish.

WARRANTY & AFTER-SALES SERVICE

Every machine carries a warranty of one (1) year from the date of commissioning, covering the repair or replacement of parts in case of manufacturing defects. It does not cover malfunctions resulting from misuse, neglect or external factors such as unstable power, accidents, tampering or force majeure, nor wearing parts consumed in normal operation — sealing knives and cutting blades, Teflon tape, heaters, filters and screens.

Installation, commissioning and operator training are arranged by Miroplastic, and an operating manual is supplied with each machine. Technical support is available by telephone and email during the warranty period and thereafter. Spare parts and consumables are available from Miroplastic.

Photographs are for reference only. Miroplastic reserves the right to improve the specification of its machines without prior notice. Actual output depends on the material, width and thickness run.
